PROJECT

•

DESKTOP VOICE ASSISTANT: JARVIS

This project aims to develop a personal-assistant for desktop. It has been designed to provide a user-friendly interface for carrying out a variety of tasks by employing certain well-defined commands. Functionalities of Jarvis Is – It can send email on user behalf, Wikipedia searches for user, capable of opening websites like Google, YouTube etc., in a web browser. This project is made with the help of Python. Python is an emerging language so it becomes easy to write a script for Voice Assistant in Python.
